

CMK ELECTRO POWER PVT LTD.

(An ISO 9001:2015 Certified Company)

Chemical Industries

Crane Industries

Paper Industries

Automobile Industries

Power Plant

Manufacturer of EOT Crane & Control Equipments

BEST QUALITY CRANE CONTROL EQUIPMENTS AT REASONABLE PRICING

ABOUT US

CMK ELECTRO POWER (P) LIMITED is one of the leading manufacturer of high quality and wide range of material handling equipments and control equipments.

CMK ELECTRO POWER (P) LIMITED is an expert engineering and manufacturing company, which excels at high quality electric crane components CMK reach both world and domestic customers with affordable products that are produced by in one of the most modern production facilities through CMK organization. In addition to our crane control equipments that are produced with the world's leading technology, we offer traditions, ethical merits and our engineering success to our customers.

CORE PURPOSE

"To Maximize the human efficiency by providing technical solution and thereby contributing to be a better tomorrow"

CORE VALUE

- We always Demands Excellence
- We always believes in hard work and Honesty
- We always Responsive & Result Oriented
- We always believes the Quality in all Aspects
- We always Respects to all & build a Strong Relationship

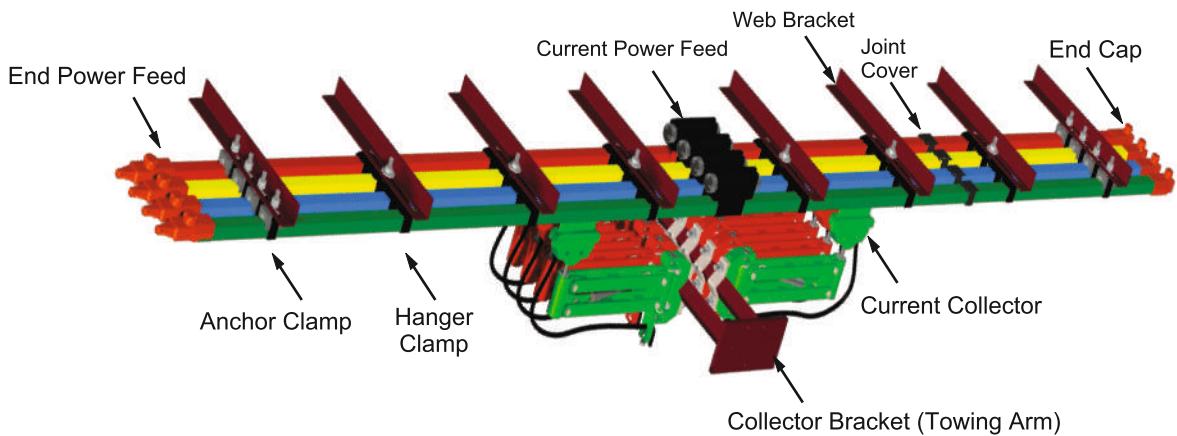

BHAG (Big Hairy Audacious Goal)

To Incorporate the Great practice of GE, Maximize the Efficiency of 50 million people and become 50 Billion Company by 2030

APPLICATIONS

Shrouded DSL initiations for EOT Cranes, Electric Hoists, Straight/ Curved Monorails, Conveyors, Amusement Drives, Electric Trolley, Transfer Cars, Automated storage systems, Material handling systems etc. Aluminum Conductors for Corrosive atmosphere

FESTOON SYSTEM (C-RAIL)

C-rail festoon system are used to electrify various types of mobile equipment. They can be designed not only to support and protect flat and round electrical cables, but air and water hoses as well. Festoon systems are typically used on overhead cranes, port cranes, refuse cranes and other material handling applications. This system also used for Electrification of Moving Machineries.

LEVER LIMIT SWITCH

Lever Limit Switch is used for heavy duty EOT Cranes Wagon shunting devices etc., to prevent over travelling or over traversing on power and control circuit up to 500 volts AC 50 Hz and 10amps and 40 amps current rating.

Function: The lever Limit switch operates when its lever reaches its pre-determined position and the lever is moved over a projecting member fixed on the Girder The Limit Switch contacts are automatically reset when the lever returns to zero position due to spring action.

SPECIFICATION

Body Material : Aluminum casting
Enclosure : IP-54
Mounting Position : Vertical
Cable Entry : $\frac{3}{4}$ " Conduit

Rated Voltage : 500V
Thermal Test Current : 40 Amp
No. of contacts : 2/3/4
Mode of operation : 2 way self resetting

SPECIFICATION

Body Material : M.S. sheet
Enclosure : IP-44
Mounting Position : Vertical
Cable Entry : $\frac{3}{4}$ " Conduit

Rated Voltage : 500V
Thermal Test Current : 40 Amp
No. of contacts : 2/3/4
Mode of operation : 2 way self resetting

SPECIFICATION

Body Material : Black Nylon
Cover Material : Impact proof thermoplastic
Enclosure : IP-65
Mounting Position : Any
Drive : Worm Drive

Cable Entry : $\frac{3}{4}$ " Conduit
Contact Material : Double break silver cadmium
Wire Connection : Screw terminal
Rated Voltage Insulation : 500 V / A.C
Thermal Test Current : 16 Amps

GRAVITY / COUNTER WEIGHT LIMIT SWITCH

Weight Operated Limit Switches are used on control/power circuit of reversing drives so as to limit their rotation / movement within a predetermined position

SPECIFICATION

Body Material : Power Coated Aluminum Die Cast
Enclosure : IP-55
Mounting Position : Floor
Cable Entry : $2,\frac{3}{4}$ " Conduit
Rated Voltage : 500V / AC

Thermal Test Current : 10/40 Amp
No. of contacts : 2/3/4
Wire Connection : Screw terminal
Operation : 720/hour

SPECIFICATION

Body Material : M.S. sheet
Enclosure : IP-44
Mounting Position : Floor
Cable Entry : $2,\frac{3}{4}$ " Conduit

No. of contacts : 2/3/4
Contact : Double Break Silver Cadmium

ROTARY GEAR LIMIT SWITCH

Rotary Gear Limit Switch is basically consists of heavy duty worm gear drive. The worm gear unit is built in a cast housing fitted on main body of Limit Switch. The cam shaft which extends from behind the gear in to housing, accommodates the cams adjustable actuators which are fitted on the cams. These actuators strikes the contact finger of respective contacts.

Function: Limit Switch is to stop the mechanism of drive at the extreme clock wise/anti clock wise position. These rotary limit switches are particularly suited for use on reversing drives such as electric hoists, winches, overhead cranes and traverse.

Application: Rotary geared type limit switches are suitable for use reversing drives such as hoists, winches, rolling mills and various other mechanisms used such used in steel plants such as coke oven and feeding machinery.

ALUMINUM BODY ROTARY GEAR LIMIT SWITCH

SPECIFICATION

Body Material : Aluminum Die Cast
Degree of Protection : IP-55
Gear Ratio : 1:48, 1:60, 1:96
Drive : Worm Drive

Cable Entry : $\frac{3}{4}$ " Conduit
Rated Voltage : 500V / A.C.
Thermal Test Current : 10/40 Amp
No. of contacts : 2/3/6 Maximum

HEAVY DUTY CASTING ROTARY GEAR LIMIT SWITCH

SPECIFICATION

Body Material : CI Casting With Sheet Cover
Degree of Protection : IP-45
Gear Ratio : 1:48, 1:60, 1:96
Drive : Worm Drive

Cable Entry : $\frac{3}{4}$ " Conduit
Rated Voltage : 500V / A.C.
Thermal Test Current : 10/40 Amp
No. of contacts : 2/3/6 Maximum

FG ROTARY GEAR LIMIT SWITCH

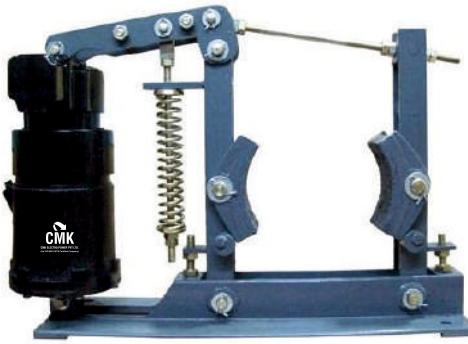

SPECIFICATION

Body Material : Black Nylon
Cover Material : Impact proof thermoplastic
Degree of Protection : IP-65
Gear Ratio : 1:12, 1:25, 1:50, 1:100, 1:200, & 1:400
Drive : Worm Drive

Cable Entry : 2, $\frac{3}{4}$ " Conduit
Maximum Rotation Speed : 1200 rpm
Contact Material : Double Break Silver Cadmium
Rated Voltage : 500V / A.C.
Thermal Test Current : 10 Amp

ELECTRO HYDRAULIC THRUSTER BRAKE

Our mill duty Thruster Brakes are suitable for 440 Volts, 3 Phase A.C. supply for a wide range of drum sizes, from 100mm to 600 mm dia. Higher sizes can also be supplied against specific requirements. The brake is applied by the tension of the compressed springs mounted vertically between the thruster and brake lever. The thruster rods are connected with the brake by means of an angle lever As the piston travels upwards the angle lever turns, pushes the brake rod and compresses the brake spring Simultaneously, the brake lever on the other side of the wheel (Brake Drum) is retracted.

Brake Model	Brake Drum Dia mm	Brake Torque		Brake Model	Brake Drum Dia mm	Brake Torque	
		kg-m	N-m			kg-m	N-m

ELECTRO HYDRAULIC THRUSTERS

Electro-Hydraulic Thruster A compact 60watt, 2800 rpm. 415v/50Hz/3-ph, non-ventilated motor is directly mounted on the top of a moving aluminum piston. A cast iron tank containing the brake fluid acts as the cylinder, the piston separates the cylinder into high pressure and low pressure chambers. The bi directional impeller is mounted directly on the motor shaft. The upper clevis is integral with the top and shield of the motor and the lower clevis is on the bottom of the tank cover.

EHT-68K	68	76	200
EHT-113K	113	76	250
EHT-225K	225	127	420
EHT-295K	295	127	580

BRAKE SHOE LINER

CMK Manufacturing a wide range of brake linings, which is of excellent quality. These are made of soft but tough heat resistant material with a high coefficient of dynamic friction we offer rubber brake linings, asbestos brake linings. automotive brake linings, which are made using a unique blend of ingredients such as asbestos, friction dust, resins etc. These products are used in industrial brake application.

AC FAILSAFE ELECTROMAGNETIC DISC BRAKE

Very compact and modern in design, Foundation is not necessary as they are directly mounted on non-driving end shaft of the motor. It consist of liner plates (Brake Disc) with square hole at the center One corresponding piece of square hub is supplied with the brake. This hub is keyed to the motor shaft and the liner plate is free on this hub. Normally Liner plate is gripped between two discs with the help of spring pressure they work on 230 / 415 VAC When the current is supplied to the brake, one disc is attracted by electromagnet against spring pressure and the liner plate is released. Thus the brake is 'off'. Once the brake is set it does not require adjustment or maintenance When the liner plates wears with the use then only air gap is to be maintained periodically An arrangement to release the brake manually could be provided on request

ELECTROMAGNETIC DC BRAKE

Our DC Brake has a name as absolute reliable brake for use in almost every application. As standard, this brake is available in 10 different sizes for static or dynamic braking with re-settable air gap design. Due to several variations and options, this brake series is preferred by motor manufacturers for universal use.

Benefits :

- ▶ manual hand release
- ▶ micro switch or inductive sensor to monitor brake function or wear limit
- ▶ friction plate or adapter flange
- ▶ tapped bores for tacho mounting
- ▶ dust protection ring
- ▶ temperature feeler
- ▶ rest period heating
- ▶ low noise version

AC SOLENOID BRAKE

AC Solenoid Brake that are suitable for AC supply up to 440 volts, and are available for a wide range of drum sizes from 100mm to 380mm Dia. We stand in the midst of prominent electromagnetic brakes suppliers based in India

AC Brakes

- ▶ 4" Dia / 5.5" Dia / 7" Dia

Solenoids

- ▶ Type : SLB - 25 mm stroke length
- ▶ Type : SLD - 31.4 mm stroke length

Features

- ▶ Class F- insulation of the coil
- ▶ Continuous & intermittent duty
- ▶ Long life & ease of maintenance
- ▶ Ideally suited for applications such as Cranes, Hoists, Machines, Valves, Conveyors

AC SOLENOID BRAKE - TYPE-S

Type of Brake	Wheel Inch		Max. Torque		Duty

S-7	7	177.8	50 75	68.0 102.0	Continuos intermittent

STAINLESS STEEL PUNCHED GRID RESISTORS

Resistors are designed to meet requirements of both A.C. & DC applications. The basic types of resistors are stainless Steel and Punched Steel Resistors these are manufacture for current ratings from 10 to 800 Amps. Continuous resistors of higher ratings are manufactured using 2 or more parallel paths. Resistors with short time rating up to 3000 Amps or even more for neutral earthing are possible which suitable for system voltage up to 11 kv and above,

RATED VALUE (Ohms)	Grid Type	Current rating for various duty factors (Amps)

Technical Specification

Enclosure	-sheet Steel Duty hot Dip Galvanized/painted
Mounting Protection degree	-IP-11/ IP-21/IP-23/IP-33
Current rating (s.s. grid) continuous	-7-400 Amps
Current rating (p.s. grid) continuous	-7-800 Amps
Cooling	-Air/oil cooled
Temperature rise	-2250C/2500C/3750C
Cable entry	-Bottom
Series Connection	-Punched grid elements are tig weided.

MASTER CONTROLLER

Master controllers are used for operation of contractor's equipment controlling E.O.T. Cranes & Rolling mills drives. The controllers are made in dust proof enclosure in IP-54 degree of protection, up to 6 notches either side with maximum 24 contacts as per desired sequence with spring return arrangement & deadman's handle arrangement are available Master Controllers are compact up to 4-0-4 step suitable for Grab-Hoist, CT-LT maximum contacts 16 per motion with spring return arrangement.

Technical Specification

Body Material : MS sheet	Frequency of operation : 1000 switching per hour
Enclosure : IP-44 / IP-54	No. of contacts : 24 maximum
Mounting Position : Horizontal/Vertical	No of step : 6-0-6 maximum
Rated Voltage : 500 V	Optional arrangement : Spring return/deadman's
Cable entry : 2x 20/2x26 Conduit	Handle Contact Material : Sliver Cadmium
Thermal Test Current : 40 amp	

ANTI-COLLISION DEVICE

(Collision avoidance system for crane and moving machineries)

The Anti-collision system is a safety device to avoid to collision of two electric overhead travelling cranes working on the same rails. For one pair of cranes two sets of anti-collision system are required. Each set consist of an Emitter/sensor module and a Reflector.

Product Specification

3 PHASE DSL INDICATING LAMP

Bus-bar 3 Phase power indication approach towards Crane Bus-bar 3 Phase power indication for overhead cranes. It is a vibration-resistant solid-state LED based unit which provides along maintenance free operating life.

- Extremely low power consumption of < 5Watts/Phase.
- Use of ultra-bright LED for Omnidirectional view from long distances.
- Clear indication of phase energized status of supply on the adjacent bus-bar.
- So there is no confusion to plant personnel.
- Low Cost replacement of incandescent lamps which are generally used for this application.

APPLICATION :

Overhead Crane Bus Bar system.

Operating Temperature	20° to 85° C (optional on demand)
Operating Power	4.5 Watt / Phase
Supply Voltage	4 terminal wiring with one common neutral & three phase wiring
Color	Red, Yellow, Blue

WIRE LESS RADIO REMOTE CONTROL

CMK is one of the leading manufacturer and supplier of industrial wireless Radio remote controls

Application

Any equipment machine which is electrically operated through contactor control can be converted to remote operation. EOT Crane, Hoist, Conveyors, Mobile Hoppers, Gantry Cranes, Container Cranes, Jib Cranes PLC Controlled Equipments, Tower Cranes, Bascule bridges, Mud Guns & Drill Machines, Stacker-Reclaimers, Furnace doors, Transfer trolleys, Carnage covers, Manipulators and all moving machineries

Specification

Material : Glass-Fiber-PA

Enclosure Protection Class : IP-65

Power supply : 18-65V AC/DC,85-440 AC/DC(optional)

Control distance :100 mtrs (200 Mtrs is customised)

Temperature Range: -40°C to +85°C

ROUND CABLE WITH DUAL STRAIN RELIEF CORDS

Made for heavy duty applications in particular for pendant push button stations and moving electro mechanical components. The two steel wire ropes are embedded, diametrically opposed to PVC sheathing. The rope cut into lengths and just hooked the steering control to avoid any stress on the cable ROUND CABLE WITH DUAL STRAIN RELIEF STEEL WIRES-S05VVD7-F

Technical Specification

- Comply with CEI 20-22 II (flame resistant)
- Insulation class 2/30
- operational voltage 300/500V
- Sheathing colour blue
- Internal conductors with flexible PVC Sheathing progressively numbered, plus earth conductor (yellow/green)
- Operating temperature: -5°C +70°C
- 2mm steel wires
- Breaking point: 60 kg/mmq

BRAKE DRUM

CMK Brake Drum with Flexible Geared Coupling that serve the dual purpose of coupling transmitting mechanical power as well as providing brake drum of suitable size for mounting brake within same space. The Models of Brake Drum Coupling are available 100 mm Dia to 600 mm Dia.

BRAKE DRUM GEARED COUPLING

CMK Brake Drum Couplings that serve the dual purpose of coupling transmitting mechanical power as well as providing brake drum of suitable size for mounting brake within same space. The Models of Brake Drum Coupling are available 4" to 10"

GRAVITY TYPE CURRENT COLLECTOR

Offered Gravity Type Current Collector advanced production unit as per set industry norms using supreme grade raw materials and innovative techniques sign of stage and earth conductors, low upkeep and strong plans. To serve the huge needs of customers, our designers try to adjust according to current market patterns.

FEATURE

- ▶ These are dust and shock safe framework
- ▶ Weather proof surface
- ▶ Current limit is 60-350 amp evaluated at 100% duty course
- ▶ Shock proof
- ▶ Sturdy design
- ▶ Fine finish

RAIL CLAMP (CUP TYPE / FLAT TYPE)

We offered clamps are widely used for preventing the movement of railroads. The provided clamps are manufactured using quality tested raw material under the observation of our deft professionals. Clients can buy these Rail Clamps from us in bulk at the most affordable rate.

FEATURE

- ▶ Easy to install
- ▶ Strong construction
- ▶ Robustness

CMK ELECTRO POWER PVT. LTD.

CMK ELECTRO POWER PVT. LTD. is a stockist & distributor for giovenzana in the INDIA. We carry a large inventory of giovenzana products to include control equipment for material handling and lifting equipment.

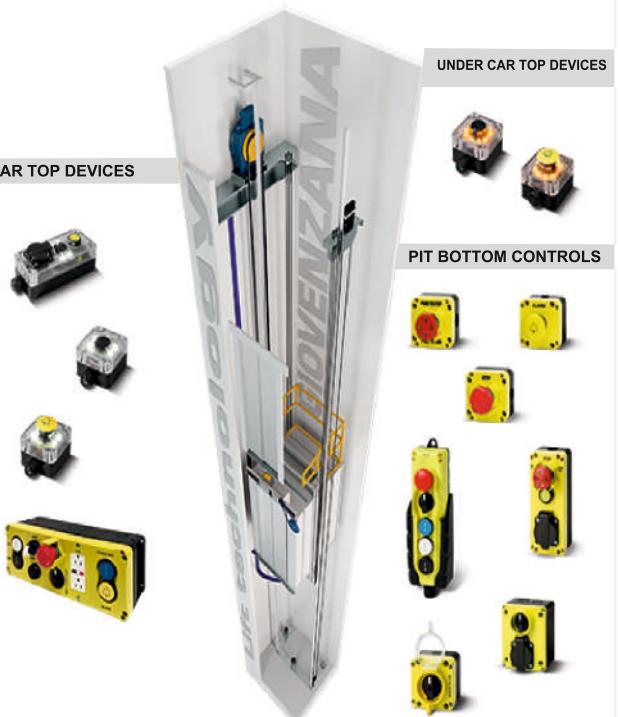

GIOVENZANA INTERNATIONAL B.V. is the global manufacturer of control equipment for material handling equipment, lift and elevator and automation products.

Control Equipments For Lift and Elevator

Giovenzana the undisputed leader in its field. The range includes pit bottom push button station, recall drive control units and inspection

LIFT TECHNOLOGY OF GIOVENZANA

Control Equipments For Material Handling Equipments

Crane Pendant station, Rotary gear Limit switches, Lever limit switches Busbar systems, C rail festoon system, Flat and pendant cables.

OUR ESTEEMED CUSTOMERS
